

Facts

Setup and Handling

- ✓ Powerful & comprehensive web application
- ✓ Real-time access to all data from all devices
- ✓ Optimized interfaces for different devices, users and tasks – without any limitations in numbers
- ✓ Easy to use with low training requirements & professional roll-out support

Operational Efficiency

- ✓ Process-optimized workflow management
- ✓ GLP ready documentation
- ✓ Best navigation by visual representation of racks & cages
- ✓ Supports paper free operation in animal rooms if desired
- ✓ Excellent colony management
- ✓ Better communication between all users
- ✓ Easy and 100% precise documentation in real time

Compliance

- ✓ Administrative platform to govern IACUC protocols
- ✓ Easy census (per d/w/m/y) & check of cage capacities
- ✓ Easy actual severity assessment
- ✓ Best in class strain-/line administration
- ✓ Intuitive management of experiments & breeding colonies

Features

▶ Reporting & census module

automatic reliable census of animals/cages, per diem, e.g. for billing

▶ Compliance module

for seamless IACUC protocol management, competence management, experimental documentation & severity assessment

▶ Project/colony administration

optimized for breeding colonies & experimental groups

▶ Assignment module

for animal ordering, sample tasks or experimental procedures; infos on individuals or groups

▶ Biopsy & sample module

exact traceability of all samples, e.g. for genotyping, configurable automated sampling tasks or individual jobs

▶ Breeding & mating modules

sophisticated LAVAN business logic, supports in- & outbreeding; easy retrieval of suitable mating partners and continuous surveillance of mating success

▶ Veterinary module

to record sickness, abnormalities & treatment history
